Breastfeeding Comments	Case manager states that pt will return to incarceration until May 3rd. She is unsure if patient will be allowed to have access to an electric pump or if she will be allowed to use a hand/manual pump. She has a call into the case manager at the facility to find out. Spoke with patient's Obstetrician and he has written a prescription for the pump if it is allowed at the facility. Reviewed manual expression with patient but she states she has already been doing it before the baby was born.	Case manager states that patient will be allowed to pump in facility. Gave hand pump with pumping instruction s. Pt verbalized an understanding.	Pt denies any questions or concerns at this time. She has not used pump yet to check fit. Instructed patient to try pump to make sure flanges are appropriate size/fit and to call me to let me know if she needs larger flanges. Pt being discharged today at noon. Pt has number to call.
